*Eye Surgeons with
Results that Surpass
National Benchmarks*

History and Growth

The Coburn-Kleinfeldt Eye Clinic was founded in 1977 with the goal of providing world class, innovative eye care to Southeastern Michigan. The practice has grown to include eight physicians with three state-of-the-art offices and a specialty ophthalmic ambulatory surgery center.

As the leading multi-specialty ophthalmology group in Michigan, we have renamed ourselves the Ophthalmic Specialists of Michigan or "OSM" for short; a name that truly describes who we are for both our patients and referring physicians.

*Same talented physicians....
Same quality results.... Different name*

Eye Surgeons Whose Results Surpass National Benchmarks

Ophthalmic Specialists of Michigan is dedicated to providing the highest quality patient care. As a leading eye surgery practice in southeast Michigan, we monitor our patients' surgical outcomes and are proud of our results.

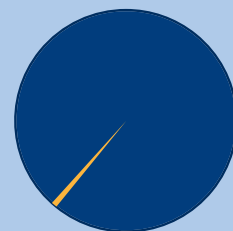

We know that results matter to you and to your referring physician when you need treatment for a serious eye condition. We are able to achieve these outstanding results because of the expertise and experience of our physicians, nurses and technicians; the use of the most advanced equipment and technology; and a commitment to excellence.

Our Patients Evaluate Their Surgical Experiences

Patient satisfaction is not solely reliant on surgical outcomes, but instead encompasses an overall experience. All of the patients who are treated at our Livonia Outpatient Surgery Center are asked to complete a brief evaluation after surgery. During 2014, 99% of our patients rated their treatment as either excellent or good.

Almost every patient (99.9%) said that they would recommend the Ophthalmic Specialists of Michigan to a friend or relative with an eye disorder. In addition, patients commented on their experience, saying, "Absolutely wonderful experience," "Staff were outstanding", "Felt safe", "Provided compassionate care" and "It was very professional".

99% of our patients rate their treatment as excellent or good.

Surgical Results Exceed National Benchmarks

CATARACT SURGERY

During 2016, Ophthalmic Specialists of Michigan ophthalmologists performed 3,418 cataract surgeries with excellent overall results, a very low complication rate and no infections. Of this total, Dr. Kleinfeldt performed 2,784 cataract surgeries, more than any other cataract surgeon in Southeast Michigan. Data from the American Academy of Ophthalmology show that OSM eye surgeons have a much lower complication rate and better results than the national average for cataract surgeries.

LASER PROCEDURES

During 2016, Ophthalmic Specialists of Michigan ophthalmologists performed 2,320 laser procedures with no complications.

SURGICAL RETINA PROCEDURES

Our retina physicians performed 862 surgical retina procedures during 2016 at the Livonia Outpatient Surgery Center. An independent study group reviewed our retina surgical outcomes and found that 98% of surgically-treated eyes had better vision. Less than 2% of patients' eyes had unchanged vision. In addition, 99% of our retina surgery patients were successfully treated with only one surgical procedure. These results are better than published reports of retinal surgery outcomes.

GLAUCOMA SURGERY

Ophthalmic Specialists of Michigan surgeons performed 703 glaucoma surgeries during 2016. Our outstanding results exceed published standards, including those reported in the leading Shields Textbook of Glaucoma.
